DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 9 and 12-20, drawn to method of making an epoxy sight bowl, classified in class 264, subclass 229.

II. Claims 21-30, drawn to a power transformer, classified in class 174, subclass 142.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another process such as curing the filler-less epoxy compound within the mold and not pre-stressing.

2. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by

Art Unit: 1772

their different classification, restriction for examination purposes as indicated is proper.

3. A telephone call was made to Steven Maslowski on September 3, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher P Bruenjes whose telephone number is 571-272-1489. The examiner can normally be reached on Monday thru Friday from 8:00am-4:30pm.
